

## **605 Hydraulic Swing Gate**

### **605 Hydraulic Swing Gate**

Hydraulic linear ram for swing gates

#### **RELIABLE, LOW NOISE AND VERY POWERFUL**

605 is the hydraulic linear ram for industrial or residential installations at intensive use. Excellent materials, compact structure and adjustable thrust enable its use also in the harder situations

Precision mechanism and the use of hydraulic oil as motor fluid are the secrets ensuring very quiet movement.

The installation is easy and fast, does not require any modification to the gate structure.

#### **Technical characteristics**

- Hydraulic automation, 110V ac
- Suitable for leaves up to 2 m or 4 m long
- Easy to install
- Simple and safe unlocking system by key
- Anti-crushing safety adjustable by two highly sensitive by-pass valves
- Quick and silent
- Oil soaked gear motor
